Reaction time ruler (US Letter)

Cut out parts A and B and glue the grey tab of B under the top of A so the 15 cm lines meet. Zero goes between the catcher's open finger and thumb. Read the line at the top of the thumb: centimetres on the left, milliseconds on the right. playreactiontest.com/ruler-drop-test

Scale check: this line is exactly 10 cm. If a real ruler disagrees, reprint at 100% / Actual size.
